

GOMESA Projected Expenditures, FY 2020-2022

- 1. 40 Arpent Canal Levee – Lockport Co. Canal to Butch Hill Station (Lafourche)** - \$6.4M to improve the 40 Arpent Canal Levee from the Lockport Company Canal to the Butch Hill Pump Station.
- 2. Levee Improvements for Gheens Community (Lafourche)** - \$1M to protect the community of Gheens from future hurricane storm surge flooding.
- 3. Hollywood Canal Closure Structure (Lafourche)** - \$6.5M to construct a canal closure structure with 400 c.f.s. pump capacity on the Hollywood Canal at Prospect St.
- 4. Reach L (SLLD) (Lafourche, Terrebonne)** - \$6M to design and construct approximately 1.5 miles of earthen levee to +10 ft.
- 5. Little Bayou L'Bleau Structure (Lafourche, Terrebonne)** - \$1.3M to construct a water control structure on Little Bayou L'Bleau along the Reach L alignment of the Morganza to the Gulf hurricane protection system.
- 6. Rosethorne Basin Phase 1 & 2 (Jefferson)** - \$11M to construct the Rosethorne Tidal Protection Project, a component of the Lafitte Tidal Protection alignment. Phase 1 will construct 1.9 miles of floodwalls/bulkheads/gates to +7.5 ft. Phase 2 will improve 3.5 miles of levee to +8.5 ft.
- 7. Grand Isle Beach Stabilization (Jefferson)** - \$10.3M to restore and protect approximately 1 mile of beach and dune on the western end of Grand Isle, near the Caminada Pass Jetty.
- 8. Bayou Lafourche Pump Station (Lafourche)** - \$35M to improve pumping capacity for a critical pump station on Bayou Lafourche that will provide freshwater to the marshes in Lafourche Parish.
- 9. West Shore Lake Pontchartrain (St. Charles, St. John, St. James)** - \$4.5M for data collection and preliminary design services for the West Shore Lake Pontchartrain Project in St. Charles, St. John the Baptist, and St. James Parishes. The project includes a federally authorized Hurricane Protection Levee system to provide flood risk reduction to homes and business within the protected project area.
- 10. Bayou Chene Flood Protection Structure (St. Mary)** - \$75M to construct a permanent floodgate that can be closed on Bayou Chene in Amelia to prevent parts of up to six parishes from backwater flooding due to the Atchafalaya River.
- 11. New Orleans to Venice Drainage Canal Relocation (Plaquemines)** - \$7.5M to relocate drainage canals along a segment of the USACE New Orleans to Venice hurricane protection system.
- 12. Magnolia Ridge Levee Lift and Road (St. Charles)** - \$3M for data collection and preliminary engineering and design services for upgrades to the Magnolia Ridge Levee, a component of the Upper Barataria Basin Risk Reduction Project in St. Charles Parish.
- 13. Davis Pond Upper Barataria Risk Reduction (St. Charles)** - \$6.5M for data collection and preliminary engineering and design services for the Davis Pond reach of the Upper Barataria Basin Risk Reduction Project in St. Charles Parish.
- 14. Sunset Levee Upper Barataria Risk Reduction (St. Charles)** - \$3.5M for data collection and preliminary engineering and design services for upgrades to the Sunset reach of the Upper Barataria Basin Risk Reduction Project in St. Charles Parish.
- 15. St. Tammany Ring Levee (St. Tammany)** - \$9M to evaluate, design and begin construction of flood control features needed around Slidell.
- 16. T-Wall Kellog Pump Station (St. Charles)** - \$2.5M to construct a T-Wall adjoining the Kellog Pump Station in St. Charles Parish to provide closure of the levee system.
- 17. Goose Bayou Penn Levee (Jefferson)** - \$11.7M to complete the Goose Bayou Penn Levee, a segment of the Lafitte Tidal Protection levee alignment.
- 18. 100-yr Levee Lift: Oakville to LaReusitte and MRL 179 (Plaquemines)** - \$1.5M to elevate levees to provide 100-year level of protection in the Oakville to LaReusitte area.
- 19. HNC Lock Complex (Terrebonne)** - \$57.4M to cash flow the \$357.7M HNC Lock Complex project, a critical ecosystem restoration, salinity control, and flood control project in Terrebonne Parish, and a key component of the Morganza-to-the-Gulf hurricane protection system.
- 20. Magnolia Ridge Levee Pipeline and T-Wall (St. Charles)** - \$3.5M to construct a T-Wall along a portion of the Magnolia Ridge Levee alignment in St. Charles Parish to provide closure of the levee system.
